

# Norrland soul

Our Norrland heritage is part of Polar's DNA. In the cold and the harsh climate, you cannot do things by halves. Materials have to withstand prolonged freezing temperatures, and vehicles have to cope with endless roads covered with snow and slush. Every caravan is subjected to a thorough quality test before it goes to the buyer, and carries a 7-year water-tightness guarantee. That's why the caravans from Dorotea proudly display the words "Made in Norrland".

# POLARVAGNEN

## 60 years of quality and comfort

The story of Polarvagnen begins in the 1960s. Civil engineer and nature-lover Håkan Wallin had had enough of holidaying in uncomfortable tents and cold, draughty caravans. He and metalworker Bertil Holmqvist – who constructed trailers for cars – decided to design their own caravan. It would be well-insulated and comfortable, and suitable for use all year round. Such characteristics were not offered by any caravan available at that time.

And so the very first Polar caravan took shape, and was ready for use by Midsummer 1964. Constructed in a barn in Junselevallen, Ångermanland, Sweden. It didn't have a name at that time, but their hobby project attracted a great deal of attention, and all at once they found themselves with a newly established company and factory on their hands. In 1968, production transferred to Dorotea, and Polar has remained there ever since.

Much has changed over the years, while much remains the same. Polar is still one of Sweden's leading manufacturers of premium caravans. With comfort and quality always the priority. And you can now look forward to the prospect of an exceptional caravanning experience. You will get to enjoy luxurious hydronic underfloor heating, a fully equipped kitchen and unbeatable performance on the road – and that's only the start.

Come and find your perfect – individually designed – Polar caravan. Your new second home and luxury holiday escape.

# Live the way you want all year round with Polar

Every season has its own special charm. With a caravan produced in the world's northernmost factory, you can take your home to forests, snow and sunsets. To all those experiences that put a shine on life at home and on holiday. Take your car, open the door and enjoy the view.

## A PREMIUM CARAVAN BUILT TO LAST

The stability of the caravans, the care we take in making them and the quality of the materials we use mean that 80% of all Polar caravans produced since 1964 are still on the road.

## STABLE ON ANY ROAD

The lavish design, with the most rigid bodywork on the market, provides for a safe ride all year round, on all kinds of road surfaces. One of our secrets is that the plywood floor is fitted with special reinforcing panels.

## UNIQUE CERTIFICATE TO PROTECT YOUR LICENCE

Polar caravans have the highest approved loaded weights on the market. Every caravan is also weighed individually and has its own unique kerb weight on a certificate. Polar is the only caravan manufacturer to do this. In a weight check, you won't risk losing your driving licence if the caravan weighs more than the approximate weight shown on a standard certificate.

## UNBEATABLE INTERIOR COMFORT

Polar's unique construction and insulation methods make the caravan fantastically water-tight. Polar caravans have the thickest wall and floor insulation on the market – up to 44 mm EPS. It can withstand cold, heat and noise outside the caravan. Together with the well-designed ventilation system, it provides for a pleasant indoor climate all year round.

# Built by experts so you can enjoy adventures and living life to the full

You can feel confident when buying a Polar. We are all keen caravanners ourselves, and we design and build our caravans to meet our own high standards. We know how essential the kitchen is for preparing dinner for the family after a full day out on the ski slopes. And how great it is to be able to put wet ski boots and walking boots into the heated shoe compartment. You will notice that we have positioned the seating groups at the front, as that's where you get the best light. And that small things like wall plugs and cosy lighting are in the ideal spot.

Your caravan is your second home and so naturally you want to have your say when it comes to the interior. Incorporate your own style and taste when deciding on finishes and textiles for your caravan. You can also choose between different floor plans to find the one that best matches your lifestyle. Perhaps you would like extra seats to host guests, or a bunk bed for children? Your dream is our business. No matter whether you want a small caravan for far-off adventures, or a large caravan to pitch at your favourite site – Polar is the perfect choice.

# Step by step to new experiences

How will you use your new caravan? Smaller caravans are often best if you are planning very active travels. They are flexible for hitching and unhitching and can be set up on pitches that are slightly more tricky to access. Larger vans are perfect for longer stays. They have plenty of room for storage and socialising and can be used in practically the same way as a summer cottage or mountain cabin.

## 1 Choose model

How big a caravan do you need? Start with how many people will usually be sleeping in it, and choose the size according to the number of sleeping berths you need.

## 2 Choose floor plan

Do you want a big bed and a small kitchen, or the other way round? Consider how you will use the private spaces and social areas of your caravan. Prioritise what is most important to you.

## 3 Choose equipment

Want to add a touch of gold standard? Polar caravan models are available in three ranges with different levels of equipment and optional extras. Choose the one that best suits your taste and budget.

## 4 Choose material

Personalise your caravan. Decide on the colours you want for the interior fabrics, flooring and splash guard so the caravan feels right for you.

# Which caravan should I choose?

It all depends on how much life has to fit into the caravan. How many people are going to live and sleep in it? And do you want to receive guests? To make the choice a little easier, the different floor plans are divided into four categories: single beds, double bed, flexible and family. You can see what floor plans are available for each caravan on the following pages.

## 520 Compact but complete

Its smart floor plan makes our smallest caravan both spacious and well-equipped. The Polar 520 runs smoothly on the windiest roads and is easy to park.

Living area:	12.1 m <sup>2</sup>
Internal length:	507 cm
External length with towbar:	717 cm

## 650 Secure on one axle

Polar's biggest single-axle caravan has room for everybody. Young families will appreciate the option of a children's room with bunk beds, but you can also opt for a luxurious bathroom across the full width of the caravan.

Living area:	15.4 m <sup>2</sup>
Internal length:	647 cm
External length with towbar:	855 cm

## 560 Popular favourite

If you think 'just right' is best, you're not alone. Our most popular model offers several different floor plans to choose from, including beds for everyone or an extra spacious kitchen.

Living area:	13.4 m <sup>2</sup>
Internal length:	563 cm
External length with towbar:	771 cm

## 680 Lots of options

Depending on the floor plan, you can choose to have an extra seating group for those who want peace and quiet, an extra spacious and practical kitchen, or a big bathroom – or perhaps a bedroom that feels separate from the living area.

Living area:	16.1 m <sup>2</sup>
Internal length:	675 cm
External length with towbar:	879 cm

## 590 Flexibility for the family

The Polar 590 can be a luxury home for two or the perfect place for a large family, with up to five beds. You can go for a children's bedroom, an extra large bathroom or an inviting angle kitchen.

Living area:	14.1 m <sup>2</sup>
Internal length:	591 cm
External length with towbar:	799 cm

## 730 A second home for long stays

It's always good to have plenty of storage, especially if you're going to be away for a while. With its well-proportioned spaces, this caravan is the established favourite for long stays. Here you can live comfortably whichever floor plan you choose.

Living area:	17.4 m <sup>2</sup>
Internal length:	731 cm
External length with towbar:	934 cm

## 620 Flexible, with smart storage

A large caravan that is easy to tow behind your car despite its size. Many different floor plans with smart storage spaces so you can easily take all you need for adventures on the ski slopes, fishing trips or trips to the beach.

Living area:	14.7 m <sup>2</sup>
Internal length:	619 cm
External length with towbar:	827 cm

# 520

## COMPACT BUT COMPLETE

The 520 is Polar's smallest caravan and perfect for the smaller family or lone traveller. Its smart floor plan makes it both spacious and well-equipped. A big advantage is its manoeuvrability when it comes to parking, of course. The 520 can fit even into tight

spaces. If you plan to drive up windy mountain roads or off the beaten track, it's reassuring to have this caravan behind you. 520 will become your second home for all kinds of adventures and journeys of discovery for many years to come.

Living area	Internal length	External length with towbar	External width	A-measurement
12.1 m <sup>2</sup>	507 cm	717 cm	251 cm	962 cm

# 560

## POPULAR FAVOURITE

This is Polar’s most popular model, and is perfectly suited to two people who want a comfortable, reasonably-sized caravan. It is well suited for travelling around and is easy to park. The 560 is a good choice if you want a slightly more active holiday and to visit

several places. Among the floor plans, you can choose to prioritise berths or opt for an extra spacious kitchen with plenty of worktop space. Remember that the sofa can always be made up into extra berths if the teenagers in the family decide to come along.

Living area	Internal length	External length with towbar	External width	A-measurement
13.4 m <sup>2</sup>	563 cm	771 cm	251 cm	1018 cm

# 590

## FLEXIBILITY FOR THE FAMILY

The 590 is very flexible and can be adapted perfectly to your needs. If there are just two of you, it makes a luxury home with a huge amount of space. If your family is slightly larger, up to five people can find room to settle down together.

A feature that is really appreciated by young families is the children's room option with bunk beds to make a cosy nook for the little ones. The 590 is perfect for the family that wants a largish caravan to travel around in.

Living area	Internal length	External length with towbar	External width	A-measurement
14.1 m <sup>2</sup>	591 cm	799 cm	251 cm	1046 cm

Kerb weight 1560-1600 kg | Total weight 1800-2000 kg | Single axle

# 620

## FLEXIBLE, WITH SMART STORAGE

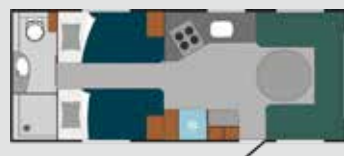

The 620 is a slightly larger caravan which comes in many different floor plans. With its wardrobes and smart storage spaces, it is just right for the family that wants to stay in one place for a while, because

you can take everything you need for a trip to the ski slopes, fishing in the autumn or a beach holiday by the coast. Although the 620 is a slightly bigger caravan, it is comfortable to tow behind your car.

Living area	Internal length	External length with towbar	External width	A-measurement
14.7 m <sup>2</sup>	619 cm	827 cm	251 cm	1074 cm

Kerb weight 1580-1670 kg | Total weight 1800-2000 kg | Single axle

# 650

## SECURE ON ONE AXLE

The 650 is Polar’s largest single-axle caravan, with a living area of just over 15 square metres. You can have up to five beds or the luxury of an extra seating group. You can also opt for a fabulous large bathroom across

the full width of the caravan, or a pleasant angle kitchen to make cooking easier. To make the bedroom and the living area feel like distinct spaces, choose a model with the double bed sideways.

Living area	Internal length	External length with towbar	External width	A-measurement
15.4 m <sup>2</sup>	647 cm	855 cm	251 cm	1102 cm

Kerb weight 1660–1700 kg | Total weight 1900–2000 kg | Single axle

# 680

## LOTS OF OPTIONS

The 680 is a really nice caravan if you want to stay in one place through the summer or winter. This model is very flexible and you have several different floor plans to choose from, depending on how many you are and how you want to use the space. Young families

may go for nice bunk beds with curtains. If you like cooking your meals from scratch, an extra spacious and functional kitchen is another option. You can also have a big bathroom across the whole width of the caravan.

Living area	Internal length	External length with towbar	External width	A-measurement

# 730

## A SECOND HOME FOR LONG STAYS

This is the perfect caravan if you intend to keep it parked for some time, perhaps for a whole season in the mountains or on a summer camp site. The 730 has plenty of space for ski boots and winter clothes, or anything else you might need. The caravan really is

a second home where you can live comfortably with well-proportioned spaces and creature comforts. Among the floor plans, you can choose a children's room with bunk beds, for example, so the kids have a cosy little den to be in.

Living area	Internal length	External length with towbar	External width	A-measurement
17.4 m <sup>2</sup>	731 cm	934 cm	251 cm	1186 cm

Kerb weight 1900-1930 kg | Total weight 2650 kg | Tandem axle

Seating group 188/160 x 225 cm

# Single beds

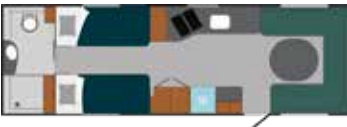

If you prefer two permanent single beds (or 'long beds' as they are also called), you should look at these floor plans. You can have separate beds in most of the caravans, and each berth will be by a window. If you want more berths, you can also make up the sofa or choose fold-up beds. Remember that the bathroom and kitchenette may vary between the different caravans.

**560 S**  
Beds 2 x 195 x 88.5 cm

# Three series, each with its own advantages

Polar caravans are available in three different series: Original, Selected and Customized, where each offers its own level of equipment, interior and exterior options and different floor plans. Whichever series you choose, you can be sure of getting a caravan of the very highest

quality, which delivers what it promises and sometimes more. Things that are often options from other manufacturers are part of the basic specification in our caravans. This is to ensure that a Polar caravan can be used all year round in the Nordic climate.

## MAKE USE OF TECHNOLOGY

The Polar Connect app gives you wireless control of your caravan. You can turn on the heating, check the state of the battery and control the fridge and lighting. You can see from your mobile whether the caravan is moving and set off the alarm if necessary. Communication with the caravan is mainly via a built-in SIM card which is activated automatically when you create your account in the app.

## ALWAYS IN A POLAR CARAVAN

### The Polar panel

Built-in DAB FM radio and Bluetooth to control many of the functions in the caravan.

### Awning service outlet

All caravans have an awning service outlet on the outside. This comprises two 230 V and 12 V sockets and an outlet cable for a TV aerial and cable TV.

### USB socket

There are USB sockets above beds and sofa groups to make it easy to recharge mobiles, airpods and tablets.

### Practical extractor fan

Extractor fan and stove with four rings supplied as standard in all Polar caravans.

### A good night's sleep

Polar mattresses are among the thickest on the market. They are made in Sweden to Polar's own unique design.

# Quality never goes out of style

Once you have chosen your floor plan and equipment package, it's time to choose colours and styles for all of the interior fittings. This includes seat upholstery, curtains, bed-spreads, headboards, as well as splash guard. The basic models of all caravans come with a

fantastic fabric called FibreGuard. The unique method of weaving the fibres makes FibreGuard extremely hard-wearing and durable, so no worries if you have children or pets on board. If you want a slightly more luxurious feel, you can choose leather upholstery for the seating group.

# Fabric

Now there are even more ways to make the caravan just as you want it. For 2024 we are updating all of the fabrics in the caravans, so you have more materials, colours and designs to choose from for your soft furnishings.

## Fine craftsmanship in every caravan

Polarvagnen has made huge progress in its 60 years as a caravan manufacturer. However, one thing has remained unchanged since we started, and that's the craftsmanship. For us, genuine craftsmanship is synonymous with quality. And the breadth and depth of experience within the company is evident in every detail. Everything has been carefully thought out and nothing is left to chance.

Polar caravans are built largely by hand in Dorotea up in Norrland. Our factory also has its own carpentry workshop for producing interiors and this gives us complete control of the entire production process. In order to guarantee quality, a single builder also installs the entire interior of your caravan. There's something rather special in knowing that every Polar caravan is made to order, and so no two are the same.

## Tested for wind and weather in the climate chamber

It is no accident that Polar caravans are known for being hard-wearing and long-lasting. Every caravan undergoes water-tightness testing in the factory's climate chamber. There it is exposed to 36,000 litres of water and gale-force winds for an hour. During this time, an inspector takes humidity

measurements inside the caravan and ensures that all quality requirements are met. That is why every new Polar caravan comes with a seven-year water-tightness guarantee, and you can rest easy in the knowledge that your caravan will cope with whatever weather comes its way.

All caravans carry a 7-year water-tightness guarantee. In other words, you can feel confident when you buy a Polar caravan.

*When you buy a Polar caravan, you decide on the range of equipment and how the interior will look, so it's basically impossible to find two exactly identical Polar caravans.*

#### WARRANTY

As the owner of a new Polar, you always have a two-year new vehicle warranty and a seven-year water-tightness guarantee. The warranties may differ between countries. For full terms and conditions, visit [polarvagnen.se/en](http://polarvagnen.se/en) or ask an authorised Polar dealer.

#### AUTHORISED SERVICE WORKSHOPS

The staff in Polar's authorised workshops receive regular training and keep up with the latest innovations and new functions. To preserve your warranty, you need to book an annual inspection with one of them. With the right service at the right time, your Polar caravan will keep going for a long time.

#### SPARE PARTS

Polar caravans are known for their longevity. As many as 80% of all Polar caravans ever made are still on the road. So there is an unusually plentiful supply of spare parts. The oldest spare parts are now from 1977.

#### ISO STANDARD

ISO 9001:2015 means that production, sales and after-market processes are quality-assured according to ISO standards. This is entirely in line with Polar's views on quality and service, which have been in place ever since we started up in 1964.

We cannot be held liable for any errors, changes in production or price, local variations, or differences between countries; note also that some pictures may show optional equipment.
